

Flow Control

Tyco Water

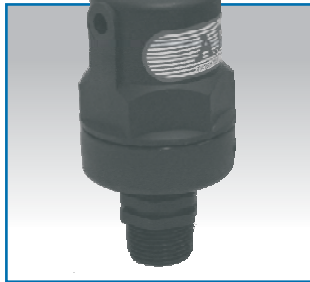

Tyco Water has now added *ARI Air Valves* to its product range.

Features

- Suitable for 'in ground' or 'above ground' applications
- Non slam versions are available
- Integrally cast flanges or BSP threaded.
- All flange dimensions comply with AS4087.
- Alternate flange dimensions available on request.
- Stainless steel versions available on request for mining and seawater applications

General Application

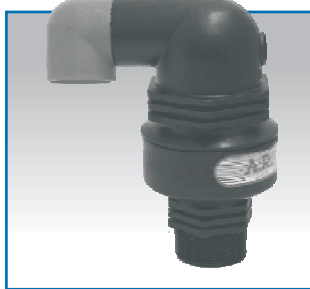

Air Valves are commonly used to discharge gases or air when filling a pipeline, bleed gases or air that accumulate during operation and to introduce air when draining a pipeline.

Automatic Air Release Valves "Segev"

Size Range: DN15 - DN25
Pressure Range: 16 - 25 Bar

Available in Nylon, Cast Iron, Ductile Iron and Bronze combinations.

Combination Air Release Valves "Barak"

Size Range: DN25 - DN50
Pressure Range: 16 Bar

Available in Nylon, Cast Iron and Bronze combinations.

Combination Air Release Valves "Shelef"

Size Range: DN50 - DN200
Pressure Range: 16-25 Bar

Available in Cast Iron or Ductile Iron

Full Bore Air Release Valves

Size Range: DN50 - DN200
Pressure Range: 16-25 Bar

Available in Cast Iron or Ductile Iron.

Combination Air Release Valves for Sewerage

Size Range: DN50 - DN200
Pressure Range: 10-16 Bar

Available in Nylon, Cast Iron and Stainless Steel
